

2009 SHERLINE MACHINIST'S CHALLENGE RULES

OBJECTIVE: The purpose of this event is to give new meaning to the phrase "home shop machinist", to encourage the use of miniature machine tools, to develop new projects that can be built on miniature machine tools and to enhance awareness of miniature machining.

THE CHALLENGE: Entries are to be a mechanical object that you would want to display on a coffee table in your home. It should be a device that you believe observers would enjoy and find interesting. Entries must be a working mechanism made up of several interrelated working parts. It may be an engine, a model of an existing or imaginary machine or any object, practical or impractical, from your imagination. The general construction should be of metal, but rubber, plastics, wood, or other materials may be used as seals, supports or parts. If entry is a scale model, materials should be duplicated wherever possible. The use of kits is discouraged. If a part or subassembly used is from a kit, it must be so identified on a card accompanying the project exhibit.

COMPLEXITY AND QUALITY: The contest organizers reserve the right to reject any entry that is deemed to be too simple, unsafe or of inferior craftsmanship and not in the spirit of the challenge statement above.

ENTRY FEE: None. Entry is free.

PRE-REGISTRATION: Pre-registration using the included form is appreciated, but is not mandatory. You may enter the day of the show at the Sherline booth.

NUMBER OF ENTRIES: A contestant may enter up to a maximum of two projects, each to be judged individually.

ENTRY DATE: Contest is to be held during the North American Model Engineer Society (NAMES) show, the Seagate Convention Center, Toledo, Ohio (USA). Judging will take place on Saturday, April 18, 2009. Prizes will be awarded at approximately 11 AM on Sunday, April 19, 2009. Entries will be accepted in person on Friday or Saturday morning before 10 AM at the show or they may be shipped to Sherline Products and we will transport them to the contest. Since voting takes place starting shortly after opening time on Saturday morning, it is recommended that your entry be ready to display as early as possible in order to obtain the most possible votes. Mailed entries must be received 10 days prior to the contest. They will be returned after the show.

NOVICE DIVISION: The "Novice" Division is for those entering projects built during the first two years since they started machining. Novice entries will be judged along with all other entries; however, a special plaque will be awarded to the winner in this division. In addition, the top novice finisher will have his/her prize money doubled. For purposes of experience, start counting the two years from when you began making your first project which was assembled from a number of fitted, machined parts, not necessarily the first time you ever used a lathe or mill. Former Novice winners are not eligible for this division even if still under two years experience.

SIZE: The project must fit within 64 cubic inches (1049 cubic cm) of volume or approximately a 4" (10.2 cm) cube. Cubic shape limits are not strictly required, and a single dimension of up to 6" (15.2 cm) is allowed as long as the volume requirement is not exceeded. A display base may be provided in addition and is not included in these dimensional restrictions. The display base, if so desired, should enhance the presentation or may enclose and protect the project. Contest personnel will have final say as to whether an entry meets the spirit and letter of this requirement.

SECURITY: It is strongly recommended that you attach your project to a base of some sort. On the project or base, provide a 1/4" or larger diameter through hole, ring, U-bolt or short length of chain so that a security cable can be passed through. A steel cable will be looped through all entries and locked to the table for security.

PROJECT PLANS: To encourage more people to get into miniature machining, if you have plans for your project which you would

like to offer for sale you may market them on a sign up to 6" x 6" which will be displayed behind your project. We will also publish the availability of your plans at no charge on our World Wide Web site.

JUDGING: Spectators at the NAMES show will judge the projects based simply upon which ones they find the most interesting, attractive and appealing. When designing your project, keep in mind that some of the judges may be engineers and model builders, but many will not. Each judge may define "interesting" in his or her own terms. Think of what a friend coming to your house might find amusing, attractive or interesting, keeping in mind this friend might not be an engineer.

Each show spectator who wishes to judge will be given five votes. Near each entry will be a container. Spectator/judges will be instructed to drop a vote in the container corresponding to each project they find among the five most interesting. They may not award more than one vote per project, but must award one vote each to what they believe to be the five best projects.

The number of possible votes will be determined by the number of entries. For each project entered up to 25 projects, 100 votes will be available. The maximum total votes will be 2500 if 25 or more projects are entered. For example, if 19 entries are received, 1900 votes will be available. Each vote received by a project will be worth \$1.00 (one dollar) in prize money. Therefore, if a project received a vote from every voter, it could win a maximum of \$500 if 25 or more projects are entered. (In the event not enough spectators participate to allot every possible vote during the voting period, the votes cast will be factored to give a higher value to each vote so that all the prize money will be awarded proportionally.) Each entry is likely to win a portion of the prize purse, as it is unlikely there would be any entry that at least some judges wouldn't find in their top five. Though we cannot guarantee every entrant will win prize money, in all previous contests no entry has ever gone unrewarded.

Counting of the votes will take place after the close of the show on Saturday. Prizes will be awarded Sunday morning in the form of cash or check to winners who are present at the show. If the contestant is not present, a check will be mailed. Only the special objects provided by the sponsor will be counted as votes. Votes will be counted by a representative of Sherline Products, Inc. Any contestant or member of the public who so requests may be present at the counting.

ELIGIBILITY: Contestants can be from any part of the universe. Age, race, sex, or religious preference will not have a bearing on the outcome of the winning entry. A team entry will be accepted, but all members of the team must have actively participated in the entry's construction. Contestants need not be present to win, but must sign an entry form stating they are the builder of the entry. Employees of Sherline Products Inc. or any sponsor of the contest are not eligible.

Previous entries are not eligible for prizes, but we encourage you to submit them for display for the enjoyment of the spectators at the show. They will be displayed alongside but separate from the new entries. Also, if you just don't like entering contests but have an appropriate project you would like to display, we will be happy to display it alongside the contestants as long as it meets the entry requirements and we have the room.

RESPONSIBILITY: The judges, sponsors, and staff will make every effort to protect and return all entries to the contestants in the same condition they were received; however, we cannot be held responsible if they are stolen or damaged while on display. If you believe this constitutes an unacceptable risk, you may personally watch over your entry while it is being judged and on display, or simply don't enter.

Contestants who wish entries returned to them should supply return shipping labels, method of shipping preferred, and shipping costs in US dollars. Foreign entries should include all necessary customs declarations, in English, to avoid any delays in the US postal system. Good luck and have fun!

CONTINUED FOR 2009—SPECIAL YOUTH DIVISION

YOUNG C. PARK YOUTH AWARD: \$500.00

Young C. Park of Honolulu, Hawaii has donated \$1000.00 to the Joe Martin Foundation to be used for the purpose of getting young people interested in machining and model engineering. \$500.00 was awarded in the 2003 and 2004 contests. Mr. Martin decided to continue to fund the award in Mr. Park's name in this and future contests.

ELIGIBILITY: Any entrant who is 19 years old or younger on the day of the contest will automatically be considered eligible for this award. Previous winners of the Novice Division are also eligible if under 20.

DISTRIBUTION OF THE AWARD: The award will be distributed \$250 to first place, \$150 to second place and \$100 to third place. If there are not three eligible entrants, only a portion of the potential

\$500 will be distributed. Award of the Young C. Park special prize money is in addition to any money due as a result of the regular voting. Should the Youth Division winner also be winner of the Novice Division, his/her regular winnings will be doubled as noted in the rules above, but the Youth Division award will not be doubled.

PROOF OF AUTHORSHIP: Select a project that is appropriate for the builder's skill level. It is asked that the entrant do all the actual setups and machining operations with only verbal assistance from a mentor. The purpose of this prize is to encourage participation and learning, not to have them watch Grandpa build it for them, so please resist the temptation to "help". Entrants may be asked to describe how a part was made to assure that they understand the processes involved.

Sherline 2009 Machinist's Challenge Entry Form

Please fill out this form and bring it with your entry to Sherline's booth at the North American Model Engineering Society (NAMES) show at the Seagate Convention Center, Toledo, Ohio on Friday April 17th or Saturday morning, April 18th, 2009. If you will not be attending the show, send this form along with your entry to Sherline Products, 3235 Executive Ridge, Vista, CA 92081. A Sherline representative will transport your model to the contest, display your model and return it to you along with your winnings in accordance with the rules. If you have a digital photo of your project, please submit a copy on diskette in .tif or .jpg format to be used in future press releases on the contest. Color prints 4 x 6 or larger are also acceptable.

NAME: _____

STREET ADDRESS: _____

CITY, STATE, ZIP: _____

PHONE: _____

E-MAIL: _____

DIVISION: REGULAR NOVICE (Less than two years experience) YOUTH (Under 20 years old on day of contest)

Was your model built using Sherline equipment? YES NO (It is not a requirement that Sherline equipment be used in order to enter the contest, we just want to know for our own purposes.)

YOUR AGE: _____

DESCRIPTION OF MODEL: (In addition to name of project, include materials used, unique features of the design, how long it took to make and any other information that would be of interest to someone looking at the model)

By entering this contest, you give your consent for Sherline to use photographs and descriptions of your entry in press releases and advertisements for the contest and for Sherline Products.
