

## Compact Workshop 1—Shop in a Closet/Marvin Meit

---

Below is a photo of Marvin's shop. It takes maximum advantage of the confined space of a 6-foot closet. Anyone who thinks they don't have room in their house for a shop should study this photo. Organization is a necessity when combining this many tools and materials in such a small space, but it definitely works.

*Marvin makes custom components for Pocher and other large scale model cars to super-detail them.*
