

Arm Mount for Ball Screw Z-axis

P/N 56442

About the Arm Mount for the Ball Screw Z-axis

P/N 56442 is basically the same as the arm mount P/N 56440 that is on our NexGen mill. The difference is that we have drilled and tapped the four mounting holes so the column bed will now mount directly to the arm mount. You can either buy the new arm mount from us, or you

can drill and tap the four 10-32 holes in your existing arm mount (see print below). We made the new arm mount so the column will be rigid.

Thank you,
Sherline Products Inc.
